# How to make your vision board

2027

## 1 Get quiet first

Set aside an hour, make a warm drink and fill in the worksheets before you cut anything. Your goals decide the board, not the other way round.

## 2 Pick your life areas

You don't need all twelve. Choose the four to six areas that matter most to you in 2027 and print those headers.

## 3 Choose your words

Read through the word cards and keep only the ones that make you feel something. Write your own on the blank cards.

## 4 Add icons and color

Pick a few icons for each area. Use one theme for a calm look, or mix the boho and bright sets.

## 5 Lay it out, then glue

Arrange everything on your board and move pieces around until it feels right. Only then pin, tape or glue.

## 6 Keep it where you look

Hang it by your desk, mirror or closet door. Come back to the quarterly check-ins every three months.

### What you need

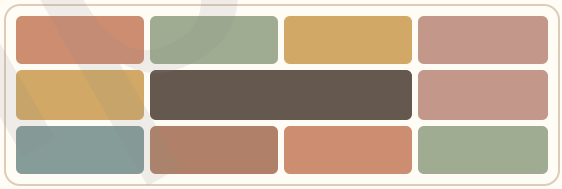

- [ ] Printer and cardstock (65–110 lb) or plain paper
- [ ] Scissors or a paper trimmer
- [ ] Glue stick, washi tape or push pins
- [ ] A cork board, foam board or poster card
- [ ] Your own photos for the photo frames (page 3 shows how)

### Three easy layouts

AREA COLUMNS

### Going digital?

Open the 16:9 digital board PDF or the ready-made wallpaper images. Set one as your laptop or phone background so you see your goals every day.
